If your bird is seen by anyone other than an Avian Vet, I will not accept them back in my home without another full Avian exam, blood panel and test for Chlamydia. No exceptions!!! I will not jeopardize my birds or any other bird/birds boarding in my home.

*****Annual Avian Vet exams, blood panel are required *** (This means, every year YOU MUST have your bird have the required test)**

*****If you need to find an Avian Vet for grooming, I am more than happy to assist with finding you someone closer to you.**

*****A virus transmits most bird diseases, which is usually air borne. One sick bird can wipe out an entire flock....I WILL NOT ALLOW THIS TO HAPPEN IN MY CARE.**

***Medical Release Form with emergency numbers is a must.**

*****ALL services are paid in advance for expected number of days and a major Credit Card along with driver's license will be kept of file for bird emergencies.**

*******While our guests, be assured that your feathered friends will be well cared for by someone who loves and respects birds and all living creatures.**
